Sania Shoukat

Frontend Developer (React.JS)

+92 328 794 3836 | gitacc519@gmail.com| linkedin.com | Portfolio| GitHub

SUMMARY

I am a Frontend Developer specializing in React.js with strong skills in JavaScript, HTML, and CSS. I have experience in building responsive and user-friendly web applications using modern component-based architecture. I am passionate about writing clean code, improving UI/UX, and continuously learning new technologies to enhance my development skills.

Work Experience

Frontend Developer intern – DevelopersHub Corporation *April 2026 – Present*

- Worked on frontend development projects using **HTML, CSS, Bootstrap, JavaScript, and Tailwind CSS**.
- Built responsive web pages, personal portfolio, calculator and gaining hands-on experience in practical web development.
- Organization: DevelopersHub Corporation

Frontend Developer Intern – UDevs *January 2026 – April 2026*

- Worked on multiple frontend development projects using **HTML, CSS, Bootstrap, Tailwind CSS, JavaScript and React**.
- Developed responsive user interfaces and learned industry-standard frontend practices.

- Organization: **UDEVs**

PROJECTS

---

1. Event Registration System

– Developed a React-based event registration system featuring dynamic event listings and a user-friendly registration form.
– Integrated Firebase for real-time storage and management of user registrations. Built as part of a **Mid Hackathon** project.

[View project]

2. Travel Booking (App)

_ Developed a cross-platform mobile application using Expo (React Native) for travel booking. Integrated Firebase as the backend for real-time data storage and user authentication.

[Github link]

3. Product Management Dashboard

_ Built a product management dashboard using React.js. It supports full CRUD operations with category filtering, search, and image upload/preview support.

[View project]

4. TrustSphere Organization System

_ Built a TrustSphere Organization system to organize daily operations in one place. It helps organizations to manage donations, beneficiaries, events, volunteers, and workspace settings through a clean dashboard interface.

[View project]

5. SkyPort

_ Built a modern role-based SkyPort web application portal for airport operations and passenger services. Built with React and Vite, it provides intuitive interfaces for passengers to search flights and manage bookings, employees to handle booking operations, and admins to manage flights, bookings, and users.
